

Business Catalog · 2026 Edition

Software, designed and built for your business.

A catalog of services from Devya Solutions — custom software development, web and mobile applications, UI/UX design, and digital marketing.

A software house built around your goals

Devya Solutions is a software development company creating innovative systems, websites, and applications. We work as an extension of your team — from the first discovery conversation through launch and long-term support.

Every engagement starts with understanding the business problem, not the technology. We then design, build, and ship software that is maintainable, measurable, and made to grow with you.

End-to-end delivery

Strategy, design, engineering, and marketing under one roof.

Built to last

Clean architecture, tested code, and documentation you own.

Clear communication

One point of contact, regular demos, no surprises.

What we offer

S1	Custom Software Development	Bespoke systems, internal tools, and integrations built around your workflow.
S2	Web Development	Websites, web applications, and e-commerce that are fast and findable.
S3	Mobile App Development	iOS and Android apps, from prototype to app-store release.
S4	UI/UX Design	Research, prototypes, and design systems that make products usable.
S5	Digital Marketing	SEO, content, and campaigns that turn visibility into growth.

S1 Custom Software Development

Bespoke systems designed around how your business actually works — internal tools, operational platforms, client portals, and integrations that replace spreadsheets and manual processes with reliable software.

What's included

- Discovery, scoping, and technical architecture
- System and database design
- API development and third-party integrations
- Quality assurance and automated testing
- Deployment, documentation, and handover
- Ongoing maintenance and support

A good fit when

- Off-the-shelf tools no longer fit your workflow
- Data lives in disconnected systems and spreadsheets
- You need software you fully own and control

Toolset .NET · Node.js · Python · PostgreSQL · Docker · AWS

Web Development

Fast, search-friendly websites and web applications — from marketing sites and e-commerce stores to full web platforms. Built responsive by default and easy for your team to update.

What's included

- Corporate and marketing websites
- Web applications and client portals
- E-commerce and payment integration
- Content management systems
- Performance and SEO optimization
- Hosting setup and analytics

A good fit when

- Your website doesn't reflect where the business is today
- You're launching a product or store online
- Slow pages are costing you leads or sales

Toolset React · Next.js · Laravel · WordPress · Shopify

Mobile App Development

Native-quality apps for iOS and Android, taken from idea to app-store release. We handle design, development, testing, and publishing — then keep the app healthy after launch.

What's included

- iOS and Android development
- Cross-platform builds from a single codebase
- Backend, APIs, and push notifications
- App Store and Google Play submission
- Crash monitoring and release updates

A good fit when

- Your customers expect you in their pocket
- Field teams need tools that work on the go
- You have a validated idea ready to build

Toolset Flutter · React Native · Swift · Kotlin · Firebase

Interfaces people understand at a glance. We research how your users work, prototype early, and deliver polished designs with the system files your developers need to build them faithfully.

What's included

- User research and journey mapping
- Wireframes and interactive prototypes
- Visual design and design systems
- Usability testing and iteration
- Developer-ready handoff files

A good fit when

- Users struggle with or abandon your product
- You're designing a new product before building
- Your product grew faster than its design

Toolset Figma · Design systems · Prototyping · Accessibility (WCAG)

S5 Digital Marketing

Marketing that connects the software we build to the people it's for. Search, content, and paid campaigns run against clear goals — with reporting that shows what's working.

What's included

- Search engine optimization (SEO)
- Paid search and social campaigns
- Content strategy and production
- Social media management
- Analytics, tracking, and monthly reporting

A good fit when

- A strong product isn't getting found
- Ad spend isn't clearly tied to results
- You're launching and need momentum

Toolset Google Ads · Meta Ads · GA4 · Search Console · Email campaigns

How we work

01	Discover	We map your goals, users, and constraints, and agree on what success looks like.
02	Design	Wireframes and prototypes make the solution concrete before a line of code is written.
03	Build	Development in short cycles with regular demos, so you see progress every week.
04	Launch	Testing, deployment, and handover — with training and documentation included.
05	Support	Monitoring, maintenance, and improvements that keep the product earning its keep.

Engagement models

Fixed-scope project

Defined deliverables, timeline, and budget.

Dedicated team

Our engineers and designers, embedded with yours.

Ongoing retainer

Continuous support, improvements, and marketing.

Have a project in mind? Let's talk.

Tell us about the problem you're solving. We'll come back with an honest assessment, a recommended approach, and a clear next step — usually within a few business days.
